The first modern style catalogue was designed and published by Silca. Silca had the idea to provide to the Locksmiths a tool which allows for the easy recognition and identification of key blanks. The keys were presented in full scale drawings showing both a plan of the key blank and the profile, allowing the Locksmiths to offer up the original key to the drawing for positive identification. This style of the catalogue from Silca has been adapted world wide as an industry standard.

Il precursore dei moderni cataloghi chiavi è stato pubblicato da Silca. Da Silca nacque l'idea di fornire uno strumento di consultazione che permise per la prima volta ai negozi di ferramenta di individuare rapidamente e con sicurezza il duplicato corretto. Nel catalogo le chiavi erano riprodotte in grandezza naturale, ordinate alfabeticamente secondo la marca: con la semplice sovrapposizione della chiave originale alla pagina del catalogo era possibile individuare il duplicato cercato. Questo semplice espediente, nato per facilitare chi si accingeva a fornire dei duplicati di chiavi, divenne un canone per il settore e lo è tuttora. Ancora oggi l'impaginazione adottata da Silca, così come tutte le sue successive evoluzioni, sono divenute uno standard per il settore in tutto il mondo.

Silca gab den ersten modernen Schlüsselkatalog heraus. Im Hause Silca entstand die Idee, den Schlüsseldiensten ein Arbeitsmittel an die Hand zu geben womit es möglich ist, eine Kopie in kürzester Zeit zu identifizieren. Im Katalog wurden die Schlüssel in der Originalgröße, alphabetisch und nach Marken sortiert, dargestellt: mit dem simplen Darüberlegen des Originalschlüssels auf die Katalogseite war es möglich, die gesuchte Kopie zu identifizieren. Dieser einfache Notbehelf, eingerichtet zur Erleichterung aller im Schlüsselersatzgeschäft, wurde zur Regel in der Branche und ist es bis zum heutigen Tag. Heute, viele Jahre nach Einführung dieses Arbeitsmittels durch Silca gehört dieses – wie auch viele weitere Entwicklungen – zum weltweiten Standard.

Le premier catalogue moderne pour clés fut mis en page par Silca. Silca eut l'idée de fournir un instrument de consultation qui pouvait permettre aux quincailleries d'individualiser rapidement et en toute sécurité la copie correcte des clés. Le catalogue représentait les clés en grandeur naturelle, disposées par ordre alphabétique et par marque: par une simple superposition de la clé originale à la page du catalogue il était possible d'individualiser la copie désirée. Ce simple expédient, né pour faciliter qui devait copier les clés, est devenu et reste encore aujourd'hui pour tous un outil de travail essentiel dans la profession. Aujourd'hui, à distance de plusieurs années, la mise en page que Silca a utilisée et toutes les évolutions qui ont suivi, sont devenues standard dans ce secteur, dans le monde entier.

El primer catálogo de llaves moderno fue editado por Silca. De Silca nació la idea de proporcionar un instrumento de consulta que permitiese a las tiendas de ferretería determinar rápidamente y con seguridad el duplicado correcto. En el catálogo, las llaves venían reproducidas a tamaño natural y dispuestas en orden alfabético de marca: con la sencilla superposición de la llave original en la página del catálogo era posible determinar el duplicado deseado. Este sencillo recurso, nacido para facilitar a quienes se disponían a suministrar duplicados de llaves, devenía un canon y sigue siéndolo. Hoy, después de muchos años, la edición realizada por Silca, así como todas sus actualizaciones sucesivas, ha devenido un estándar del sector en todo el mundo.

A Silca publicou o precursor dos modernos catálogos de chaves. Da Silca nasceu a ideia de fornecer um instrumento de consulta que, pela primeira vez, permitiu às lojas de ferramenta individualizar de forma rápida e segura o duplicado correcto. No catálogo, as chaves estavam reproduzidas em tamanho natural, por ordem alfabética segundo a marca: era possível individualizar o duplicado procurado sobrepondo simplesmente a chave original à página do catálogo. Este procedimento simples, nascido para facilitar quem fornece duplicados de chaves, tornou-se numa norma para o sector e continua a sê-lo hoje em dia. A paginação adoptada pela Silca, como também todas as sucessivas evoluções, tornou-se num padrão para o sector em todo o mundo.

Acabamentos e personalizações: latão pintado e niquelado são os novos acabamentos. Há a possibilidade de outros acabamentos especiais, por encomenda, para realizar as melhores associações com os puxadores presentes no mercado;

Gestão: a partir de hoje já não será necessário adquirir todos os modelos ligados a cada família de fechaduras, mas será suficiente encomendar apenas as chaves direitas ou esquerdas.

... a partir de hoje poderá de facto escolher a sua chave patent!
